

# The Stars of September

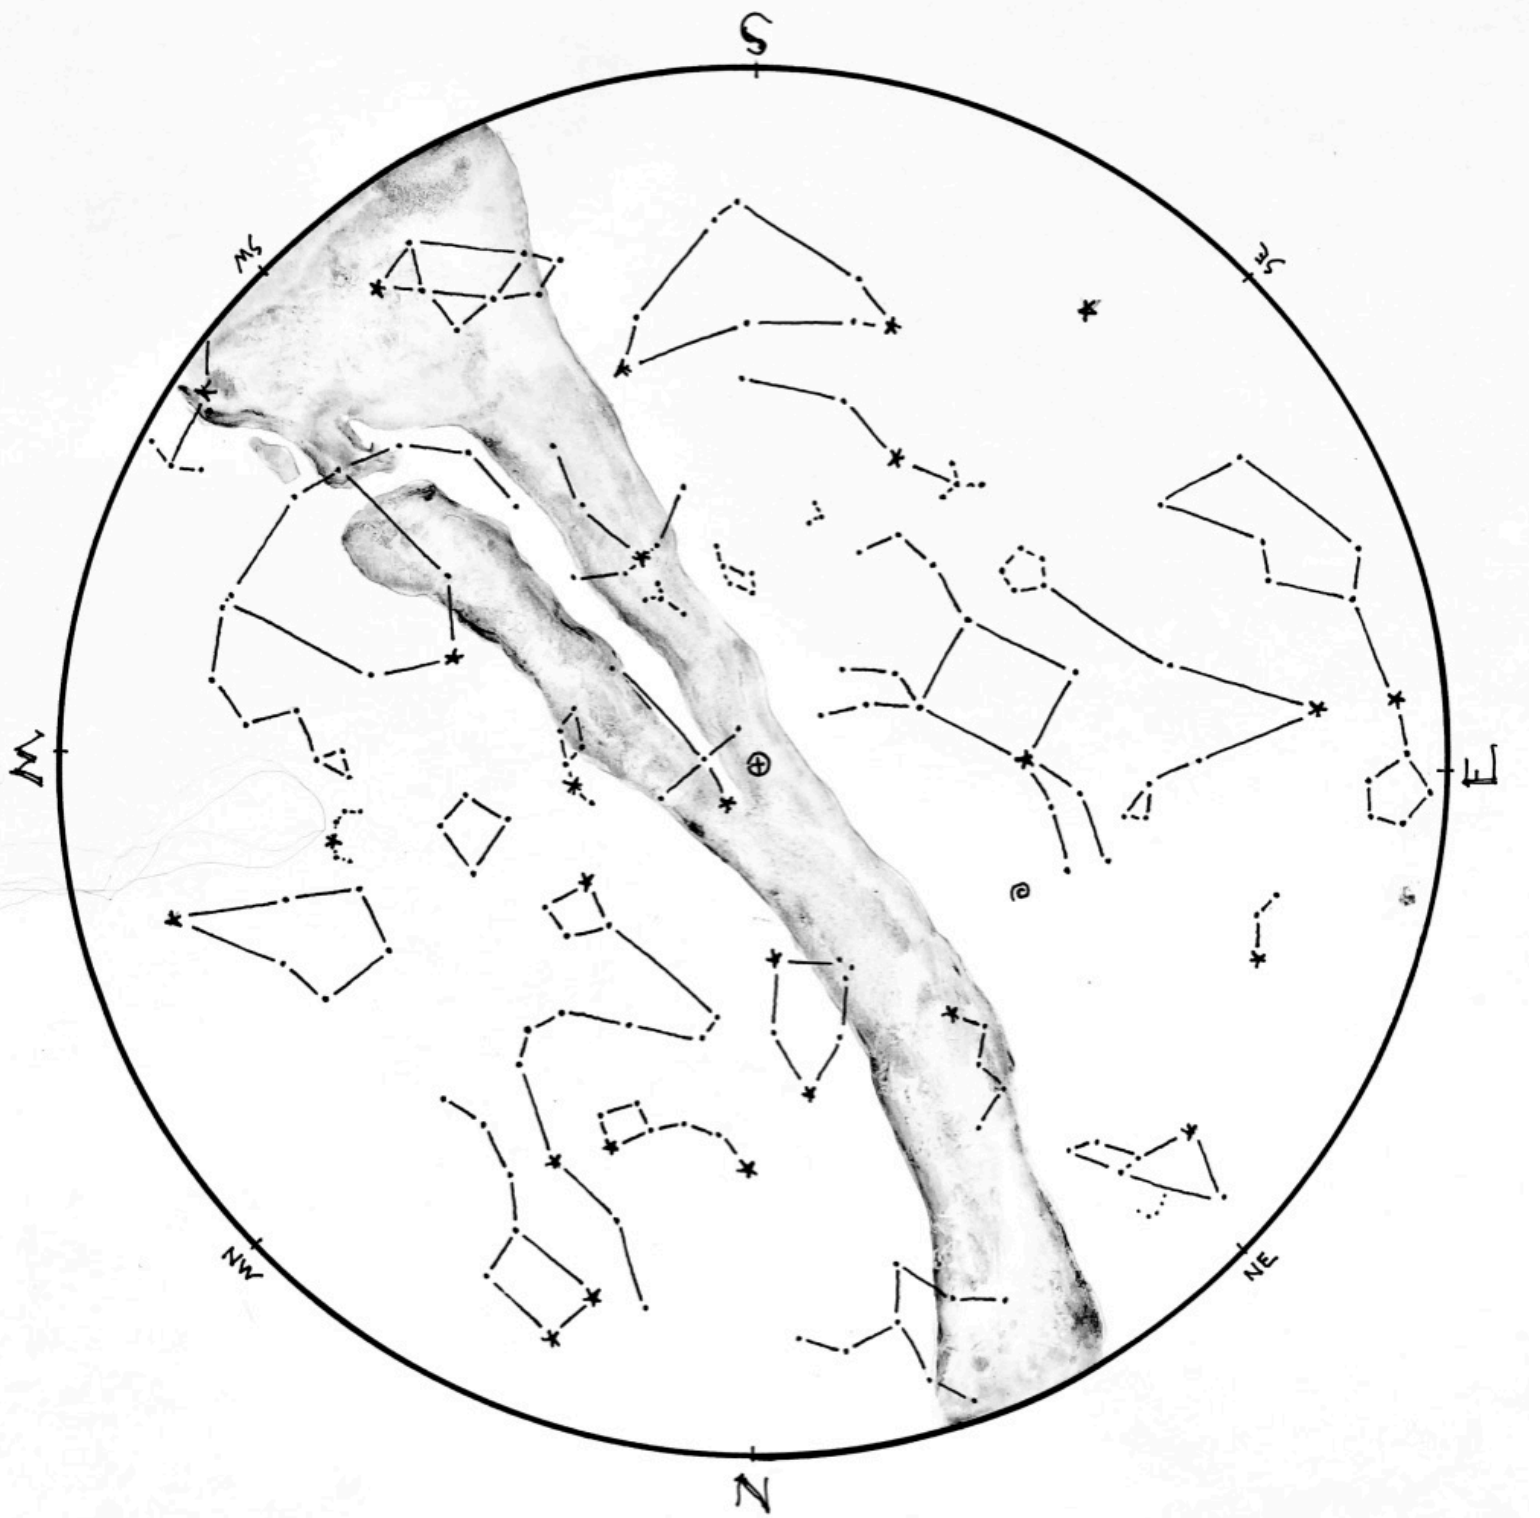

drawn for latitude 38° N

Early September @ 11 pm, mid-month @ 10 pm, late September @ 9pm

## The Stars of September (lines only)

Here's a chart of the September skies, without the labels. Try labeling it yourself when you think you're familiar with all that it shows.

## Stars of September (blank)

The chart below shows some prominent stars in this month's sky. Can you recognize them without their names or labels? You can print this chart and test yourself - connect the dots, draw the figures, see what you remember from your nights out under the stars... or, if you'd rather, invent some figures of your own!
