

# The Stars of February

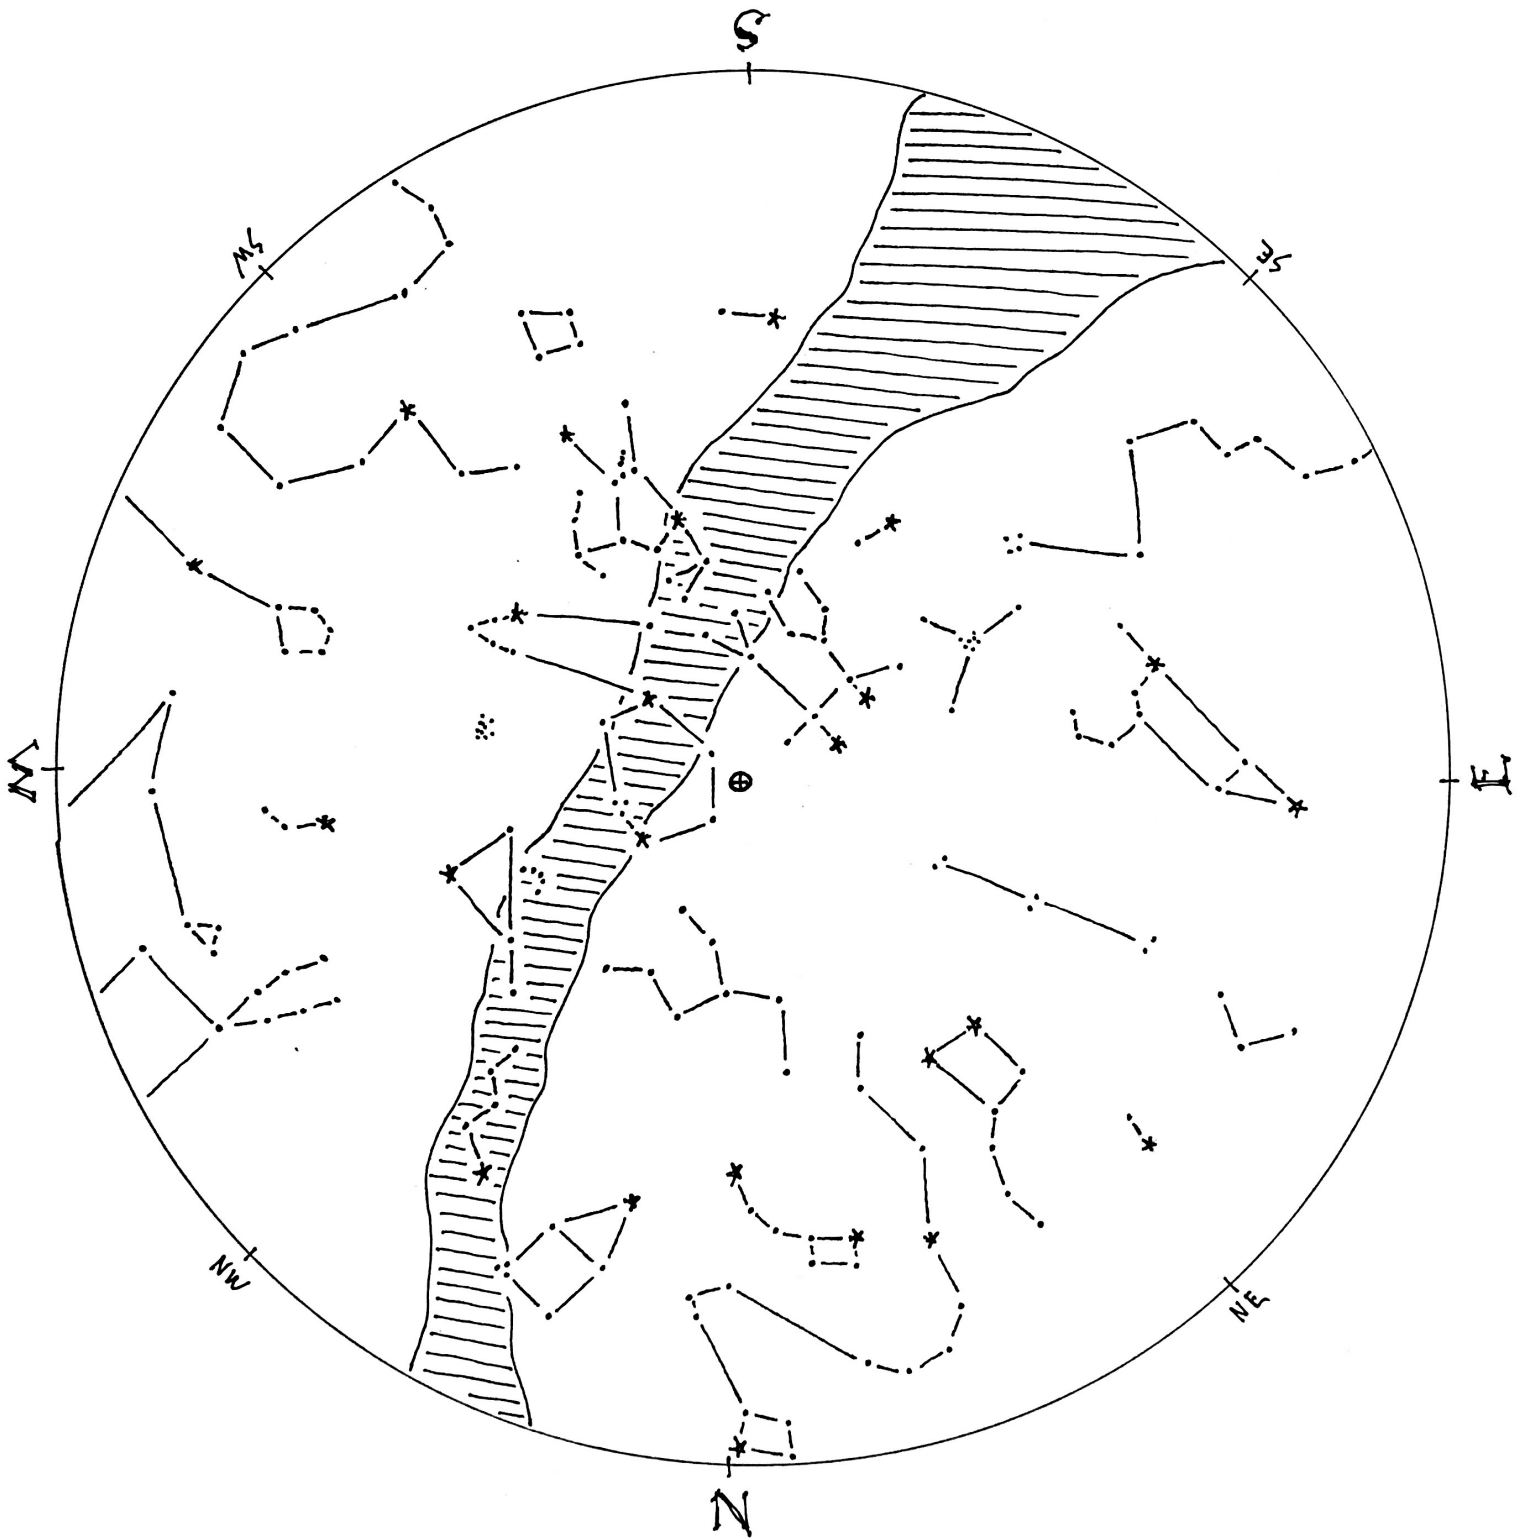

drawn for latitude 38° N

Early February @ 9 pm / Late February @ 8 pm

## The Stars of February (lines only)

Here's a chart of the February skies, without the labels. Try labeling it yourself when you think you're familiar with all that it shows.

## The Stars of February (blank)

The chart below shows some prominent stars in this month's sky. Can you recognize them without their names or labels? You can print this chart and test yourself - connect the dots, draw the figures, see what you remember from your nights out under the stars... or, if you'd rather, invent some figures of your own!
