

The stars of January

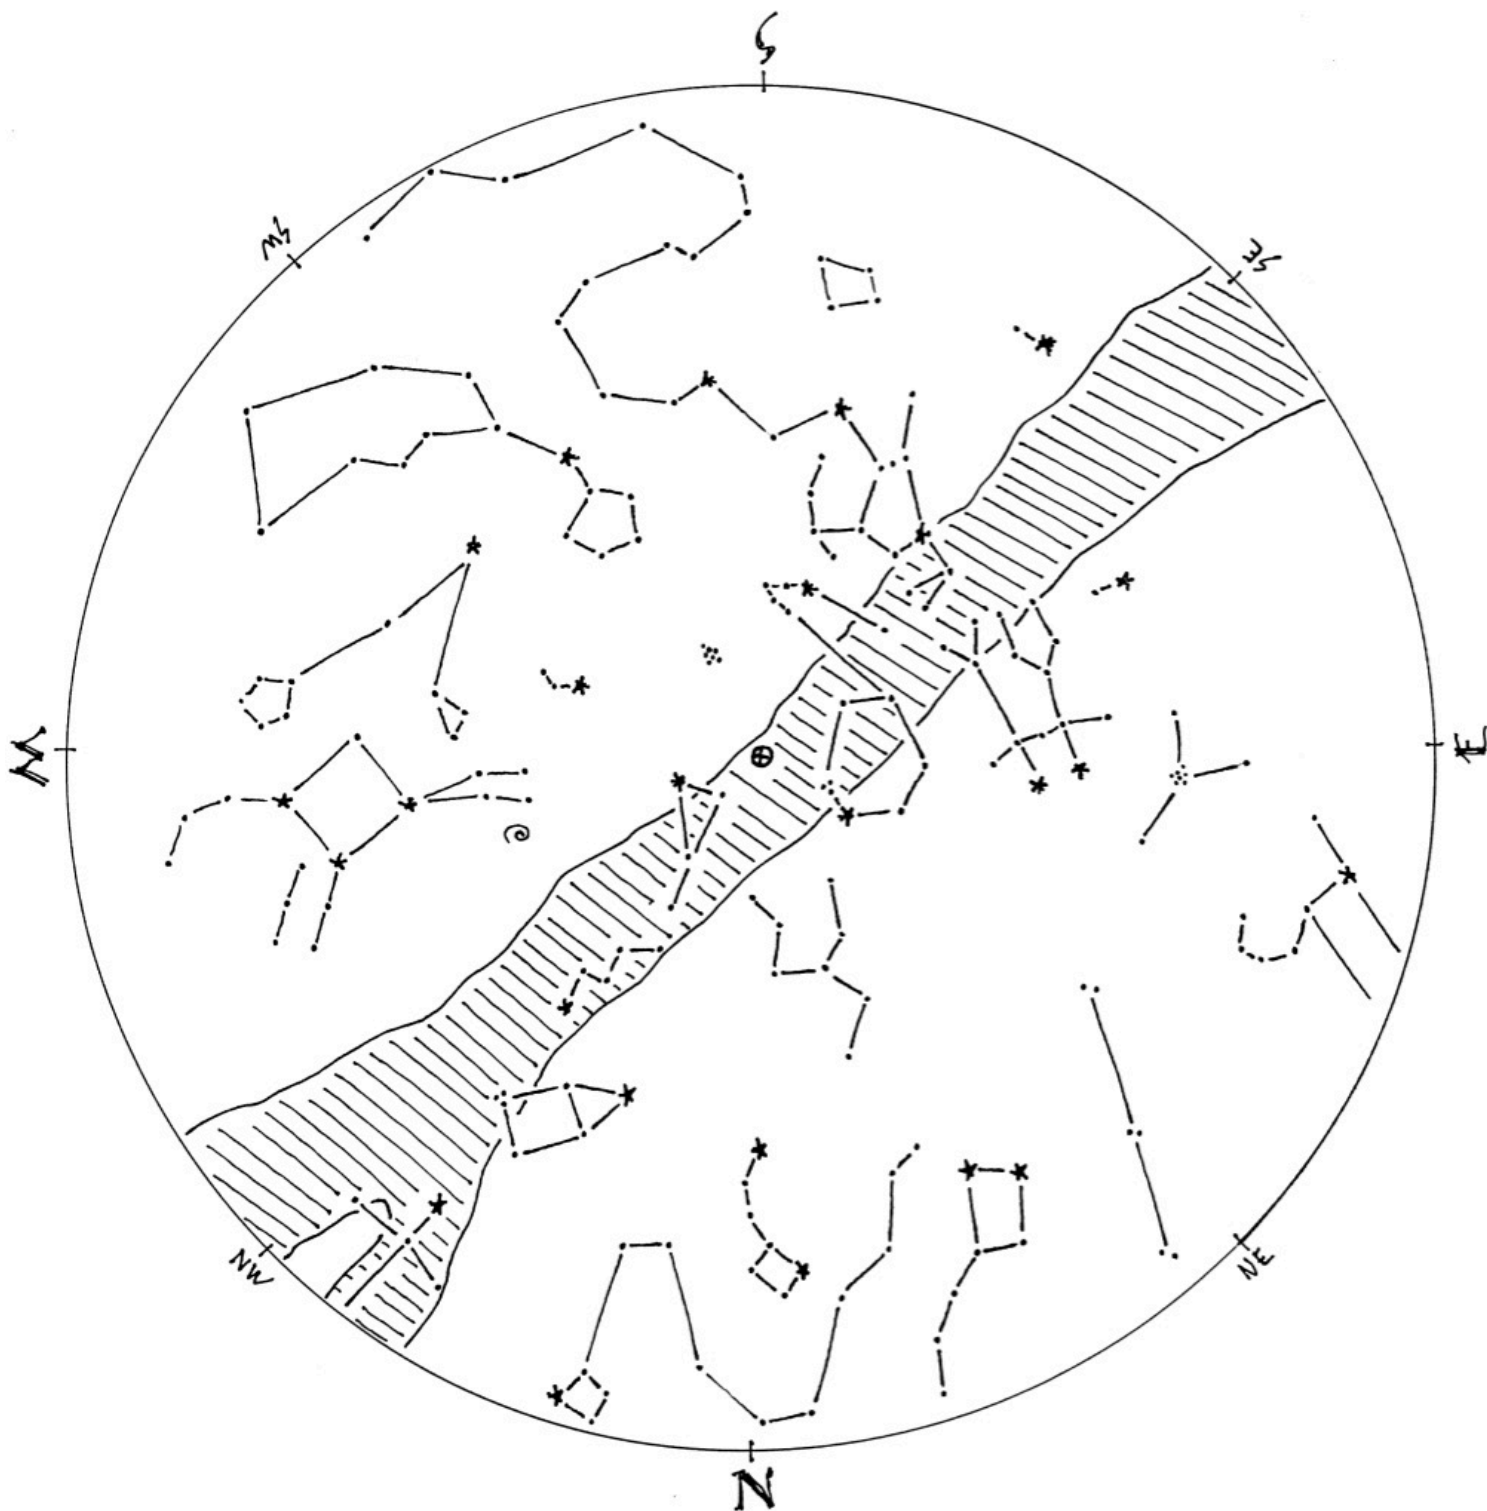

drawn for latitude 38° N

Early January @ 9 pm / late January @ 8

The Stars of January (lines only)

Here's a chart of the January skies, without the labels. Try labeling it yourself when you think you're familiar with all that it shows.

The Stars of January (blank)

The chart below shows some prominent stars in this month's sky. Do you recognize them without their names or labels? You can print this chart and test yourself - connect the dots, draw the figures, see what you remember from your nights out under the stars... or, if you'd rather, invent some figures of your own!
